

**FOR IMMEDIATE RELEASE**

## **Organic Technologies Announces Halal Certification for AlaskOmega Omega-3 Concentrates and Fish Oils**

COSHOCTON, OH – Jan 13, 2015 - Organic Technologies, producer of MSC-certified AlaskOmega® omega-3 fish oil products, announced today that it has received Halal certification for its entire line of AlaskOmega® omega-3 concentrates and fish oils. Certification was awarded through IFANCA (Islamic Food and Nutritional Council of America), the leading Halal-food certification organization in North America. As part of the Halal certification process, IFANCA inspected the Organic Technologies manufacturing facilities located in Ohio. Certification confirms that Organic Technologies is in full compliance with the stringent Halal requirements for the manufacture of products that meet the strict Islamic guidelines dealing with hygiene, dietary regulation, raw material processing, and ingredient packaging.

The new Halal certification will enable Organic Technologies to better meet the needs of their diverse customer base as the AlaskOmega® fish oil product line expands globally.

Copies of the Halal certifications are on file and available upon request.

### **About AlaskOmega®**

Organic Technologies is the producer of MSC-certified AlaskOmega® omega-3 fish oil products. We start with wild-caught Alaska Pollock oil from the cold, clear waters of Alaska's Bering Sea, which is then further refined and concentrated in our family owned and operated NSF-certified GMP facility in Coshocton, Ohio. AlaskOmega® is available in EE and TG concentrates up to 85% total Omega-3 content, as well as natural wild Alaskan fish oils. Please visit <http://www.alaskomega.com> for more information.
